Suction Catheters

For oral, tracheal and endobronchial suction procedures. To be used by connection to the suction source with Argyle™ suction connecting tubing

- Appropriate degree of hardness provides kink resistance
- Metric type has accurate positioning depth marks at each cm starting 4 cm from the distal end
- Soft rounded, open tip or bevelled tip or bevelled open tip
- Two small relieving eyes at tip / two lateral eyes with smooth edges
- Vacuum control connector – Transparent for easy observation of secretions
- Marker on funnel connector indicating direction of angled tip
- Angled tip for endobronchial suction procedures, providing easier access to the right or left bronchus
- Colour coded connector
- Effective length: 50 cm
